

Botanical Society of Washington

Meeting #977

Presenter: Dr. Karen Golinski

Smithsonian Institution, Department of Botany,
National Museum of Natural History

Peatmosses of Pacific Canada

Karen Golinski came to DC from British Columbia, Canada in 2014. Her research focuses on the taxonomy, ecology, and biogeography of *Sphagnum* (peatmosses). She is active in the areas of bryophyte and peatland conservation, and has served as a member of the British Columbia Provincial Government's Bryophyte Recovery Team, the Canadian Government's Mosses and Lichens Species Specialist Subcommittee of COSEWIC (Committee on the Status of Endangered Species in Canada), and the Burns Bog Scientific Advisory Panel.

When: Tuesday, February 7th 2017 @ 7:00 pm

Pre-meeting dinner: Meet at 5:30 pm at Elephant and Castle Pub and Restaurant.

Address: 1201 Pennsylvania Ave., N.W. (202-347-7707)

Transportation options: Federal Triangle (Blue/Orange)
or Metro Center (Red/Blue/Orange).

Presentation Location: @ 7:00 pm, Smithsonian Institution, National Museum of Natural History. Enter the building from Constitution Avenue entrance. A guide will escort you to WG-33 Conference Room (West Wing, ground floor).

Security access: If you do not hold a Smithsonian Institution issued security badge, please let the security guard know that you are here for the meeting. Otherwise, you can contact Erika Gardner (gardnere@si.edu) by **3 February 2017** to arrange a guest badge for you.

Why? Because peat moss is neat!

Light refreshments will be provided
